

TECHNICAL DATA SHEET

AXIPURE

AXIPURE-1000 IV-Acid Washed

High-purity acid-washed coconut shell based granular activated carbon designed for potable water and food grade applications.

Acid washing lowers soluble mineral content (ash) and stabilizes pH, delivering clean start-up and consistent, low-turbidity effluent.

Features & Benefits

Highly microporous structure efficient removal of taste & odor compounds and trace organics

Low ash content and controlled pH after acid washing ideal for potable water and food & beverage applications

Produced from sustainable coconut shell raw material

High hardness and low dust minimal pressure drop and long service life

Excellent adsorption capacity high iodine number and strong CTC performance

PARAMETER	TEST METHOD	UNIT	SPECIFICATION
Iodine value*	ASTM D4607	mg/g	>1000
CTC [as calculated*]	ASTM D5742	%	>50
Apparent Density	ASTM D2854	g/L	460
Moisture Content	ASTM D2867	%	<5
Ash Content	ASTM D2866	%	<2
Hardness (%)	ASTMD3802	%	>98
pH*	ASTM D3838		5-8

“Other Sizes considered on request”

Applications

Certifications & Compliance

NSF/ANSI 42 & 61 Certified

ISO 14001:2015
Environmental Management

ISO 45001:2018
Occupational Health & Safety

ISO 9001:2015
Quality Management

HALAL Certified
Jamiat Ulama-i-Hind

KOSHER Certified
JK Kosher

Packaging

Bulk bag

25 kg Bag

"Products can be customized for specific requirements in terms of pH, Iodine Number or CTC
Custom packaging can be arranged based on customer requirement"
